Empowering Zanzibar Through Digital Education

Digital Education through Free and Open Source Software (FOSS)

Spoken Tutorial is a multi-award-winning education technology platform developed at IIT Bombay. Through this platform, over 90 lakh students have been trained in various IT topics over the last 13 years. IITM Zanzibar in association with Spoken Tutorial developed at IIT Bombay is proud to bring to you a series of Self-learning hands-on Workshops aimed at empowering the students of IITM Zanzibar and the local community with essential digital tools and knowledge. These workshops will help participants to meet the challenges of today's rapidly evolving world. Some of the following topics will be covered through these workshops.
